PROJECTS

RooMantra – Full-Stack Hotel Booking Platform

- Developed a comprehensive hotel booking application using the MERN stack (MongoDB, Express, React, Node.js).
- Implemented secure user authentication and a dynamic frontend for real-time room availability and booking management.

AI Virtual Assistant – MERN Stack

- Architected an AI-powered web platform featuring conversational query handling and task automation.
- Integrated Natural Language Processing (NLP) APIs to provide real-time, intelligent responses to user queries.
- Utilized Node.js and MongoDB for scalable backend processing and conversation history storage.

Bachat Bazar – Product Comparison Platform

- Engineered a web platform for real-time product comparisons, successfully reducing information overload for users by 40%.
- Integrated advanced features including price tracking, feature-based analysis, and a fake review detection system.
- Developed using Python and JavaScript to ensure high performance and data accuracy.

Signature Detection Tool

- Built an image processing tool designed to verify and distinguish between genuine and forged signatures via user uploads.
- Designed a high-engagement "neon-themed" UI featuring custom animations and robust file validation.
